JB HI-FI Education

The Big Book of BYOD for Schools

Bring Your Own Device programs for smarter schools.

All parents want to equip their children with the latest and greatest technology available for learning. However, affordability and finding the devices that meet a school's specific curriculum and systems requirements can cause headaches for both the school and parents alike.

That's where a professionally structured and administered Bring Your Own Device Program (BYOD) can make a world difference.

BYOD from JB Hi-Fi Education. It's as easy as pi(e).

JB Hi-Fi Education's BYOD is the no-nonsense way to ensure education-specific technology that's compatible with your students and your school. Education pricing means better-than-retail savings. Ongoing tech support facilitates consistency of learning, whether at home or in the classroom.

How it works.

1. Start by connecting with our Education experts, so we can help you design a BYOD Program with your school's pedagogy and device specifications in mind.

2. Once the equipment and accessories have been identified, we'll create a code that you can pass to parents to log in to your school's BYOD Program via our online portal.

3. Parents then select and purchase the tech products that are fully compatible with your school's systems and curriculum.

4. We handle all the sales and deliveries of equipment (with options for pick-up in-store, home delivery or delivery to school) including the supply of support materials for parents and FAQs.

The big tech brands behind your school's BYOD program.

In this catalogue, we've presented a selection of school-ready devices and accessories available to you as part of JB Hi-Fi Education's BYOD offering.

We invite you to peruse these pages, find out more about our comprehensive range and begin thinking through your school's requirements for better, brighter learning in the year ahead.

Once you're ready, our experts are here to help you create a unique BYOD Program designed to support excellence in education.

Start researching.

Education

Apple creates products designed to inspire the minds of teachers and students.

Apple

 iPad

iPad

iPad is so intuitive, anyone can instantly take an idea and run with it. Mac provides the power to pursue the most ambitious projects.

Students can even start creating on iPad, then pick up where they left off on Mac. And with all-day battery life, iPad and Mac keep going long after the last class is over.

Learn, create, do more on iPad.

The power and flexibility of iPad gives students the freedom to explore and express new ideas whenever and wherever inspiration strikes. And with the powerful A13 Bionic chip, double the storage, and amazing apps on the App Store, the latest iPad delivers advanced capabilities, versatility, and simplicity at incredible value.

Write anything. Draw anywhere. Learn creatively.

iPad and Apple Pencil are the ultimate tools for school. Mark up documents, jot down notes or draw a masterpiece. There's no end to where iPad and Apple Pencil* can take your learning.

*Apple Pencil sold separately.

Ready for class. And everything else.

iPad is the perfect companion for learning. It works seamlessly with familiar apps like Microsoft Office, making it easy to collaborate on group projects.* And it's powerful and intuitive to use, so you can research a topic, take notes and play music — all at the same time.

*Apps available on the App Store.

Take the classroom outside with iPad.

iPad makes it easy to learn anywhere. With a light and durable aluminium design, this mobile classroom lets you go wherever your ideas take you.

JB HI-FI Education
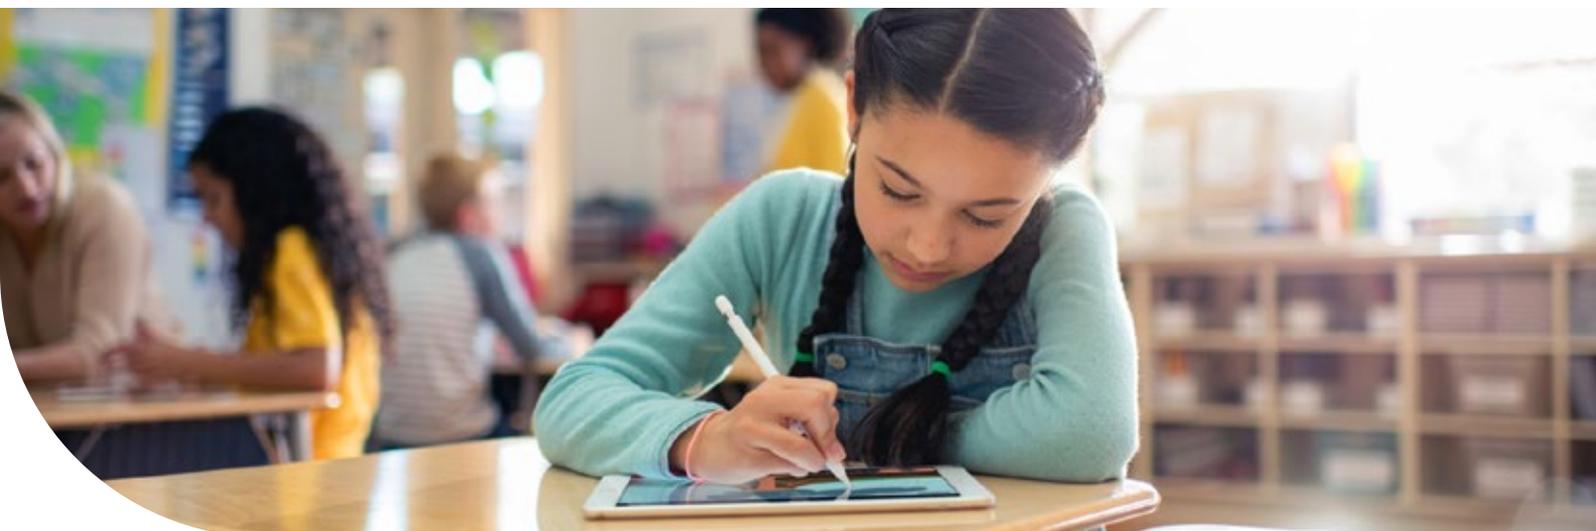

MacBook Air

 MacBook Air

Supercharged for learning.

Supercharged by the next-generation M2 chip, the redesigned MacBook Air combines incredible performance and up to 18 hours of battery life into its strikingly thin aluminum enclosure[1].

[1]Battery life varies by use and configuration.
 See apple.com/batteries for more information.

Supercharged by

 M2
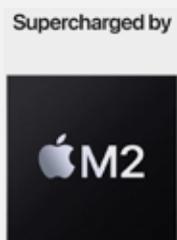

MacBook Pro

 MacBook Pro

The best for the brightest.

MacBook Pro is powered by the next-generation M2 chip, giving you Apple's most portable pro laptop for school and up to 20 hours of battery life[1].

So students can push their coursework further, everywhere they go.

[1]Battery life varies by use and configuration.
 See apple.com/batteries for more information.

Supercharged by

 M2

And with macOS Monterey, it's even easier for teachers and students to stay focused on their content and interact with apps. Content can be projected to Mac through an iPad, iPhone or another Mac device through AirPlay, enhancing collaboration. New Live Text and Visual Look Up enable Mac to leverage text or other information from an image for easy search and sharing.

Microsoft Surface

Microsoft Surface delivers experiences teachers and students love with the choice and flexibility they need to teach and learn.

JB HI-FI Education

Microsoft Surface

Empowering every student on the planet to achieve more.

Unlock limitless learning

The world is changing faster than ever – as are the skills students will need to be life-ready by the time they graduate.

With affordable and easy to manage technology that transforms classroom time, educators can focus on delivering personalised learning experiences that help enable better learning outcomes.

Support a hybrid learning environment

Creating an online classroom is an important step in moving to a remote learning environment.

Microsoft Teams for Education provides an online classroom so students and teachers can find new ways to continue to focus on learning.

Why Surface

What Surface does better

- Positive learning outcomes with Surface Pen and on-screen inking
- Facilitate real connections between students through Microsoft 365 for Education
- Accessories for a seamless, reliable and rich experience
- High-definition cameras and far field microphones

What Surface does that is unique

Security
- Silicon-to-cloud protection with firmware designed in-house
- Unparalleled manageability through SEMM
- No Thunderbolt

Deployment and manageability
- Streamlined deployment and imaging through Autopilot
- Cost and time savings from simplified experience

Warranty
- User-centric rather than device-centric
- No-touch device swaps to ease COVID concerns

Are your employees satisfied with their digital tools?

86% Improved employee satisfaction

How much time are teachers and faculty saving?

72hrs Saved when Surface is paired with Microsoft 365

How long do the calls to your IT help desk take each year?

5% Shorter help desk call times through IT Help desk

What are the quantifiable savings of Surface for Education?

$6.6m Total cost of ownership savings

How many devices does your IT team deploy each year?

4hrs Saved in time to provision and deploy through IT

How many security incidents are reported each year?

4% Of Surface users reported less security incidents compared to 40% of non-Surface respondents

Microsoft Surface

Surface Laptop Studio
Powerful, fast, and infinitely flexible

Boundary-pushing design lets your students flex their creative muscle on the sleek touchscreen, making seamless transitions from laptop to entertainment-ready stage to portable creative canvas, complete with built-in Slim Pen storage and charging*.

Three modes, infinite possibilities

Go from laptop to stage to studio mode with the Dynamic Woven Hinge.

Built for performance

Bring big ideas to life without breaking a sweat, thanks to quad-core powered 11th Gen Intel® Core™ H Series processors and blazing NVIDIA® GeForce RTX™ 3050 Ti laptop GPU.

Innovative digital pen experience

Fuel inspiration and ideas when you take notes, sketch during brainstorms, and draw like you would pen on paper[1] with Surface Slim Pen 2.[2]

Unplugged power when and where you need it

Get up to 18 hours[3] of battery life – and get back to learning at any moment with improved standby that extends battery life when you're away.

An immersive experience

Enjoy true-to-life colour and contrast on the beautiful factory-calibrated PixelSense™ Flow touch display with a refresh rate up to 120Hz, plus remarkable Dolby Vision and Dolby Vision IQ.

Best for video calls, work or play

1080p HD camera brings superior video quality with low-light performance, brightness, and skin-tone accuracy, while dual Studio Mics capture voice with crisp detail and clarity.

*Some accessories and software sold separately.

[1] Tactile signals with Surface Slim Pen 2 can be experienced on some applications on Surface Laptop Studio running Windows 11.

[2] Microsoft Surface Slim Pen 2 sold separately.

[3] Battery life varies significantly based on usage, network and feature configuration, signal strength, settings and other factors. See aka.ms/SurfaceBatteryPerformance for details.

JB HI-FI Education

Microsoft Surface

The Surface family:
as versatile as you are.

Surface Go 3

Unlock limitless learning

Designed to light up the best of Windows 11, Surface Go 3 is optimized for digital pen and touch, with a choice of Intel® Pentium® or Intel® Core™ i3 processor, tablet-to-laptop versatility, and comprehensive Microsoft security.

Features:
- Beautiful 10.5" touchscreen display
- Battery life up to 11 hours
- Supports Surface Pen and Microsoft Classroom pen
- Just 0.5 kgs (not including type cover)
- New type covers in Platinum and Black, plus Ice Blue and Poppy Red
- USB-C® port and headphone jack, plus full HD front and rear-facing cameras

Surface Laptop Go

The lightest Surface Laptop powers your essential everyday experiences. Make an impact and an impression with Surface Laptop Go, a balance of performance, battery life, and beauty.

Features:
- 10th Gen Intel® Core™ Processors
- Up to 16GB RAM and 256GB storage
- All-day battery life up to 13 hours
- Fast Charging—up to 80% in just over an hour
- Simplified security, with Fingerprint Power Button with Windows Hello and One Touch sign-in
- Front-facing 720p HD camera
- Full-size keyboard and precise trackpad
- USB-C® and USB-A ports
- Vibrant 12.4"5 PixelSense™ touchscreen display with 3:2 ratio

Microsoft Surface

Microsoft
Surface

Surface Pro 8

The classroom is more fluid than ever, and Surface Pro 8 fosters flexible, high-quality digital engagement.

Features:

- The first Surface Pro built on the Intel® Evo™ platform
- All-day battery life, up to 16 hours
- From empty to full fast with Fast Charging—from 5% to 80% in just under an hour
- Up to 32GB RAM and 1TB storage

- Rear-facing 10 megapixel HD camera to capture whiteboard notes and scan documents
- USB-C® and USB-A
- MicroSD slot6
- Vibrant 13" touchscreen

Surface Slim Pen 2

Write, sketch, navigate and recharge. Take handwritten notes and draw with the same feeling you get with pen on paper, with exceptional accuracy and a new storable design.

Features:

- Slim carpenter-inspired style is perfect for all hands and is easy to hold and control
- Haptic motor in Surface Slim Pen 2 brings the feeling of writing and drawing on paper to your PC's screen

- Delivers incredible shading and exceptional pressure sensitivity[1]

[1]Surface Slim Pen 2 experiences and compatibility vary by which device you are using it with. Visit aka.ms/SurfaceSlimPenCompatibility to learn more.

JB HI-FI Education

Microsoft

Make the most of your school budget and equip students and teachers with affordable, safe Windows laptops and 2-in-1s.

Microsoft

Windows 11

Bring learning to life.

Power to make big things happen.

Immersive learning is a game changer for practice-based learning, as it can indicate how students would react in real life scenarios. With the right device, educators and students can engage in programs such as Minecraft: Education Edition, take part in build challenges and present their work via Augmented Reality (AR) and Virtual Reality (VR) both at school and at home.

A robust yet low-cost device that can support students as active participants in these interactive spaces is Lenovo's 500w Gen 3 2-in-1 Laptop for education. It's all about keeping teachers and students connected in a world where learning can happen anywhere.

Lenovo 500w Gen 3 2-in-1 Laptop

This lightweight, convertible laptop provides a boost of power and productivity to drive learning in any environment.

Performance and productivity

Featuring the latest Intel® Pentium® processor, up to 256GB internal storage and up to 10 hours* of battery life, the Lenovo 500w Gen 3 has the stamina to keep up with a full day of learning.

*Based on testing with MobileMark 2014. Battery life varies significantly with settings, usage, and other factors.

Get connected

A 5MP world-facing camera coupled with Microsoft Teams integration enables virtual face-to-face collaboration and keeps everyone communicating in more meaningful ways. Wi-Fi 6 provides the connection speed needed for streaming, fast downloads, while browsing for research projects, watching educational videos and sharing documents at an instant.

Hand-on learning

A durable 11.6" HD IPS touch display featuring pencil touch technology, and an optional garaged AES pen allows users to easily navigate, swipe, write and annotate documents on the screen while ensuring it stays smudge-free.

Tough technology

MILSPEC tested for reliability and features 360-degree shock absorbent rubber bumpers that keep it up and running even after a tumble.

Safer by design

Front camera privacy shutter blocks the camera with a snap, so everyone has peace of mind knowing they're protected from hackers.

Speak to a JB Hi-Fi Education specialist today to learn more about affordable Windows devices.

JB HI-FI Education

HP

HP designs and builds for blended learning environments to enable anytime, anywhere creativity, collaboration and critical thinking.

HP

Built for schools, designed for learning.

HP Personal Systems are designed to meet the trials of daily use by students and with innovative touch, pen, and voice interfaces, to support active learning and flexible connectivity to expand education beyond the walls of the classroom.

Sustainability meets productivity

Sustainability and climate change matter more today than ever before with 76% of people believing environmental issues are of equal or greater concern than health issues as a result of the Pandemic[1]. Additionally, 41% of IT decision makers say that product sustainability has become more important in IT buying over the past year[1].

HP's unique approach to design enables the use of more sustainable and recycled materials while delivering amazing experiences across its PC portfolio. Its claim to having the world's most sustainable PC portfolio is based on the criteria set out by EPEAT—the most comprehensive, measurable, and transparent eco-label in the IT industry.

Administered by the Green Electronics Council, the EPEAT program provides independent verification of a manufacturer's products based on sustainability criteria, including product energy efficiency, recycled materials usage, product longevity, design for product end of life, and product packaging.

Product Faults, Extended Warranties and Accidental Damage Protection Insurance

The Australian Consumer Law (ACL) protects consumers by giving them certain guaranteed rights when they buy goods and services. For example, the ACL requires that goods must be free of defects, and do what they are meant to do. Services must be carried out with care and skill. These rights, which the ACL says automatically apply whenever goods or services are supplied to a consumer, are called 'Consumer Guarantees'.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement, repair or refund if you experience a fault with your device.

Consumer Guarantees have no set time limit but generally last for an amount of time that is reasonable to expect given factors including the cost and quality of the product.

JB Hi-Fi Refund and Warranty Policies

JB Hi-Fi will provide a refund, replacement or repair in accordance with the JB Hi-Fi Minimum Voluntary Warranty Policy set out **HERE**. This Policy only sets out the minimum time periods within which JB Hi-Fi will offer you a refund, replacement or repair and your rights under the ACL may extend beyond these time periods.

Manufacturers Warranties

Many devices supplied by JB Hi-Fi are covered by a Manufacturer's Warranty. This is at no additional cost to the customer. Manufacturer's warranties generally provide that the manufacturer shall, where goods (or parts of them) are defective within timeframe of their stated warranty:

- Repair or replace goods (or part of them); or
- Resupply or fix a problem with services (or part of them).

Extended Warranty coverage – Optional:

JB Hi-Fi offer the option to add an Extended Warranty plan, whereby the period over which the manufacturer will provide a remedy for faults is extended beyond the manufacturer's warranty. There are various lengths of Extended Warranty coverage you can select, which are designed to provide you with certainty that your product will be repaired or replaced if it becomes faulty during the period of the plan. These plans are provided by the Manufacturer and may (depending on the device selected by your school) include additional benefits such as: Onsite Repair at your school, Next Business Day Repair and/or assessment or Advance Replacement, where you will receive a new device even before your faulty device has been returned to us for assessment. These are services generally not covered by the standard manufacturer's warranty.

Accidental Damage Protection Insurance – Optional:

We all know that accidents happen with devices whether with food/ drink spills, dropping the device or other physical impacts that effect the usability of your asset. JB Hi-Fi offers its BYOD customers Accidental Damage Protection Insurance options that provide coverage for physical damage to a device. These options afford you peace of mind that, should your child accidently damage their device, you can have it repaired, with the only cost being the policy excess. This will get them back to study sooner. We note that some of our plans combine Extended Warranty and Accidental Damage Protection Insurance, which gives you both certainty that product faults are covered for a longer period and comfort that damage caused to the device is taken care of.

Loss and Theft Insurance cover – Optional:

JB Hi-Fi also offer insurance coverage for Loss, Theft or Loss and Theft (combined). If your child misplaces their device or their device is stolen, the cost of replacement can be an unexpected (and unwelcome) expense. These additional insurance options allow you to be prepared should these unfortunate events occur.

Claims:

In the case of a device fault, parents can visit https://productcare.jbeducation.com.au/ to make a warranty claim. Alternatively, they also have the option to contact the manufacturer directly. Details for this can be found at https://www.jbeducation.com.au/support/.

If considering an Extended Warranty or Accidental Damage Protection Insurance cover, parents should read the relevant terms and conditions and Product Disclosure Statements available via our support page https://www.jbeducation.com.au/support/.

The Extended Warranty products referenced in this brochure provide protection against product faults and offer additional support that may not be covered by the standard manufacturer's warranty. In addition to the standard manufacturer's warranty, you may also have rights in relation to product faults under JB Hi-Fi's minimum voluntary warranty (see https://support.jbhifi.com.au/hc/en-au/articles/360053005194-Refunds-Warranties-guide for further details) and/or the Australian Consumer Law (see https://www.accc.gov.au/consumers/consumer-rights-guarantees/repair-replace-refund for further details). You should familiarise yourself with these rights when considering extended warranty products.

JB HI-FI Education

How to use the portal

Ordering through the portal – instructions for parents

To order a device, simply:

1. Go to jbeducation.com.au/byod

2. Enter your school code or select 'school lookup' to find out if your school is registered for JB Hi-Fi BYOD online

3. If your school is not registered, please use the generic program code

4. Once logged in, select a student program

5. Choose home delivery or your nominated JB Hi-Fi store for pick up

6. Follow the prompts, enter your details, then choose your products, additional insurance options (if required) and accessories

7. Select a payment method and complete your pre-order

8. If you have any questions, please contact us at: jbeducation.com.au/byod or call 1300 730 548
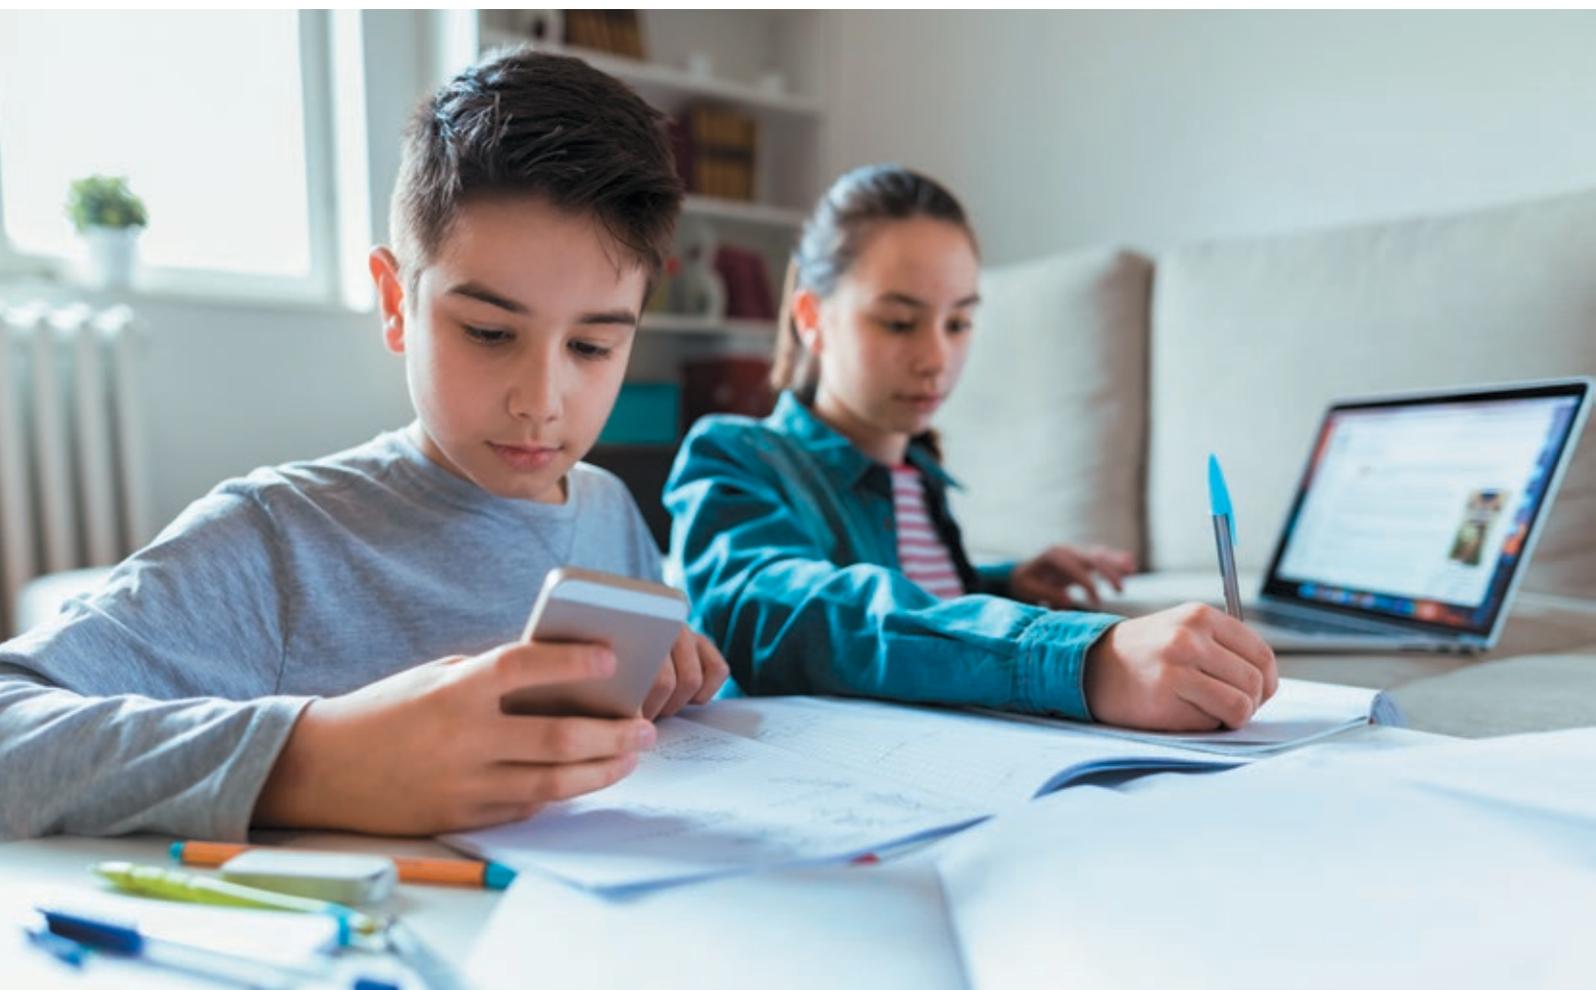

You know us, now we want to know you.

Let's get started with your Bring Your Own Device program. Reach out to our Education experts, have your questions answered and take the next step in making your school's BYOD ambitions a reality.
